Vitamins to VEGA!

17th. December, 2024

## **VITAMIN I** Vitamin B2

01

Recently, the enthusiasm of vitamin B2 foreign stock has been improved, the export inquiry is more, and the demand is planned in the first half of 25 years, but the end customer's expectation for the current market price is still declining. There is no selling phenomenon in the market, and the price of B2 is expected to be stable in the short term, but the volume is expected to increase significantly.

## **AMINO ACID I** Threonine

02

The domestic market is not active in buying and selling, the trade market price is stable, the inquiry is less. At present, the transaction is weak, the export is stable, the factory's external quotation is USD1490-1510/ton, pay attention to the transaction and export situation, it is expected that the price of threonine is stable in the short term.

## **API I**

03

Recently, Zhejiang Rongyao Biotech Co.,Ltd annual output of 1000 tons of Methyltin mercaptan, 100 tons of thiamphenicol, 100 tons of 4-(4-fluorobenzoyl) butyric acid, 130 tons of 2-carboxy-3-nitrobenzoate and other products technical transformation project in the relevant website to be approved and announced

## **FOOD ADDITIVE I** Xanthan gum

04

Recently, food additive xanthan gum affected by market demand, product prices have reached the bottom in recent years, the current domestic market transaction price in the price of USD3/kg or so, the future price does not rule out the possibility of rising in the short term.
